

Ludo Galactic Quest – Official Rulebook

Game Objective

The goal of Ludo Galactic Quest is to move all four of your tokens from your Home Planet to the Galactic Council Space Station at the center of the board. The first player to safely bring all tokens to the center wins the game!

Setup Instructions

1. Place the Ludo board on a flat surface. 2. Each player chooses a Home Planet (Mars, Neptune, Saturn, Jupiter) and takes four matching colored tokens. 3. Shuffle the Power & Challenge cards and place them in a deck face down near the board. 4. Each player rolls the dice. The highest roll goes first, and play proceeds clockwise.

Turn-by-Turn Gameplay Mechanics

- **Rolling the Dice**: On your turn, roll a single die. - **Entering the Board**: You must roll a 6 to move a token from your Home Planet onto the Launch Pad (starting square). - **Movement**: Tokens move clockwise around the board based on the die roll. - **Capturing Opponents**: If you land on a square occupied by an opponent's token, their token is sent back to their Home Planet. - **Safe Zones**: Colored squares are safe zones; tokens on these squares cannot be captured. - **Special Spaces**: Certain marked squares may allow bonus card draws or shortcuts.

Using Power & Challenge Cards

- **Drawing Cards**: Draw a card when you land on a star-marked square or when instructed by another card. - **Playing Cards**: Cards must be played immediately unless they specify "Keep Until Needed." - **Types of Cards**: - Beneficial (extra moves, shortcuts, immunity from capture) - Challenging (lose a turn, move backward, send a token home) - **Discarding**: After use, place the card in a discard pile. If the deck runs out, reshuffle the discard pile.

Winning Conditions & Variations

- **Standard Win**: The first player to bring all four tokens safely to the Galactic Council Space Station wins. - **Team Play Variation**: Form teams of two; both players must get all eight tokens to the center to win. - **Quick Play Variation**: Reduce the number of tokens per player to 2 for a faster game. - **Advanced Variation**: Allow players to hold up to 2 cards for strategic play.
